

2023

International Diabetic Lower Extremity and Other Wounds Symposium

Phuket, Thailand
25-27 Oct. 2023

International Society of Regenerative
Medicine and Wound Repair

INVITATION

It is a great pleasure to announce the 2023 International Diabetic Lower Extremity and Other Wounds Symposium. We welcome you to join us this October in Phuket, Thailand.

Diabetic foot problems significantly impair the quality of life of diabetic patients. Amputation in people with diabetes is 10 to 20 times more common compared to those of non-diabetic people. Every 30 seconds a lower limb or part of a lower limb is lost to amputation somewhere in the world as a consequence of diabetes. Up to 85% of all amputations are preceded by an ulcer.

Other wounds could also have a significant impact on the health and quality of life of patients and their families, causing pain, loss of function and mobility, depression, financial burden or even death.

The 2023 International Diabetic Lower Extremity and Other Wounds Symposium will promote better understanding of the unmet management needs of diabetic lower extremity problems and other wounds as well as the new therapeutic approaches that are currently under development.

WELCOME TO PHUKET

Phuket is one of the most beautiful beach resorts in the world, with fine white sands, nodding palm trees, glittering seas and lively towns. It is rated as one of the top ten diving spots in the world. Temples, national parks and wildlife sanctuaries also wait for your exploration. Not to mention the exquisite Thai food and freshly caught seafood.

The post-pandemic Phuket is more welcoming than ever. We look forward to seeing you to Phuket!
